Overview

Children experiment with sliders before planning and making two pages of a moving story book, based on a familiar story. They will design the page backgrounds, make the moving parts and assemble it.

Key Points of Learning

- I can make my moving picture by:
 - Designing my background
 - Cutting my moving parts
 - Making sliders for my moving parts
 - Putting all my parts together to create my moving picture
 - Possibly making guides
- I can evaluate my finished product against the design criteria
- I can consider what I have learnt from making my moving story book

Questions I want to investigate now...
